WEB DEVELOPMENT

Group 107 provides a range of software development services to its clients, including web development, apps development, and enterprise software development.

Our web development services are designed to create high-quality, responsive, and user-friendly websites that align with clients' business goals.

Group 107 specialized in web development focuses on providing customized WordPress solutions, as well as a wide range of both FrontEnd and BackEnd technologies.

The company's expert web developers specialize in creating, engaging, user-friendly, and high-performance websites that meet the specific needs of clients.

APPS DEVELOPMENT

Group 107's app development services are customized to focus on the specialized wants of each client.

The company has experience creating a wide range of apps, from simple business applications to complex enterprise-level systems.

Our developers have advanced skills in iOS and Android development, as well as web development technologies such as React and Angular and can deliver high-quality apps that meet the expectations of the clients.

ENTERPRISE SOFTWARE DEVELOPMENT

Our enterprise software development services are designed to provide customized solutions that help businesses streamline their operations, improve efficiency, and achieve their business goals.

Our developers have expertise in a range of enterprise software development technologies and tools, and they work closely with clients to create customized solutions that are addressing the specific requirements.

AI INTEGRATIONS

KEY ADVANTAGES:

Improved productivity: AI technologies can automate repetitive tasks and streamline workflows, freeing up employees to focus on higher-level tasks that require human expertise.

Enhanced decision-making: AI solutions can analyze vast amounts of data and provide valuable insights that can inform better decision-making processes.

Cost savings: Automating tasks and workflows can lead to significant cost savings for businesses over time.

Increased efficiency: AI technologies can optimize processes and workflows, reducing the time and resources required to complete tasks.

Competitive advantage: By incorporating AI solutions, businesses can gain a competitive edge by improving their operations and staying ahead of industry trends.

AI INTEGRATIONS

Group 107 is a leading provider of AI integration services designed to help businesses incorporate AI technologies into their existing systems and processes.

With a team of experienced experts, they develop, implement and integrate tailored AI solutions that can significantly improve productivity, automate tasks, and enhance decision-making processes.

Group 107's team will help you understand, manage, teach your staff and implement the right AI tool for the right usage with maximum value.

DEVOPS SERVICES

DevOps as a service is a comprehensive solution offered by **Group 107** that streamlines the software development and deployment process.

The company provides services such as continuous integration and delivery, infrastructure automation, and cloud migration to help businesses scale their operations and improve their agility.

It involves a combination of tools, processes, and practices that enable collaboration between development and operations teams to deliver high-quality software faster and with greater efficiency.

DEVOPS SERVICES

Group 107's DevOps service streamlines software development by enabling team collaboration through tools and processes. Their services like continuous integration, infrastructure automation, and cloud migration aid business scalability and agility, ensuring faster launches, higher reliability, and cost efficiency while upholding quality standards.

DevOps service accelerates the software development cycle with best practices like iterative development, automated testing, and seamless integration. This harmonizes development and operations, yielding shorter cycles, faster feedback, and adaptability to changing needs. Tailored DevOps practices aid in cultural transitions, fostering collaboration and productivity, ultimately delivering superior software outcomes. The goal is to speed up delivery, boost agility, and keep businesses competitive in a swiftly evolving tech landscape.

ACCESSIBILITY FOR ALL

We offer a comprehensive **accessibility** experience, which invites everyone to be part of the advancement in the digital age. We are committed to digital equality, removing barriers to ensure full access for all users, including those with visual impairments, ADHD, cognitive or motor disorders, epilepsy, and more.

Our enhanced **accessibility features** include full keyboard navigation, screen reader compatibility, proper title hierarchy, alt texts for images, accessible alternatives, structured navigation, WAI-ARIA integration, corrected tabular structures, and hidden texts for clarity.

We ensure digital accessibility for all organizations, adhering to W3C standards [A, AA, or AAA]. Each project concludes with an official accessibility certificate and a detailed accessibility statement, demonstrating our commitment to quality and enriching the digital experience for all users.

ACCESSIBILITY FOR ALL

The stages:

Examination and Diagnosis:

Thorough inspection to identify accessibility needs.

Report: Detailed report with improvement recommendations and action plan.

Implementation: Gradual accessibility improvements across all website/app areas.

Regulatory Compliance: Ensuring ongoing adherence to accessibility standards.

The main advantages:

Expanding Market Potential: Our accessibility solutions enable you to reach the 25% of users who cannot browse without accessibility, expanding your market.

Comprehensive Accessibility Solutions: Our platform offers a wide range of accessibility solutions to meet all your needs efficiently.

Professional Training and Support: Every customer gets a dedicated manager for guidance and support throughout the process.

Compliance With Regulation: We ensure our solutions meet the highest standards and focus on future trends to keep you ahead.

DATA ENGINEERING

Key components of our Data Engineering Services include:

Data Integration and ETL [Extract, Transform, Load]

We design and implement robust data integration solutions that efficiently extract, transform, and load data from various sources into a unified and accessible format.

Data Warehousing and Modeling

We develop data warehousing solutions and effective data modeling strategies to ensure that data is stored efficiently and in a structured manner, facilitating efficient querying and analysis.

Data Pipeline Development

We design and build data pipelines to automate the movement and transformation of data, enabling real-time or batch processing for actionable insights and reporting.

Big Data Processing and Analytics

We leverage big data technologies and analytics platforms to process and analyze large volumes of data, uncovering valuable insights and patterns crucial for business decision-making.

Group 107 provides comprehensive Data Engineering Services tailored to meet the evolving data needs of modern organizations. Our Data Engineering Services encompass a range of solutions designed to transform and manage data effectively, enabling businesses to make data-driven decisions and gain a competitive edge.

RECRUITMENT SERVICES

In Group 107 we unlock the potential of your company by providing top-notch recruiting services.

We understand that sourcing and evaluating the right candidates is crucial for the success of any organization. Therefore, our team of dedicated recruiters is committed to helping you find the most promising contenders who possess the necessary social aptitudes and specialized skills.

Our services include:

Sourcing promising contenders:

We have access to a large pool of highly qualified and pre-vetted candidates who are actively seeking employment. Our recruiters use cutting-edge technology to find the most relevant candidates for your vacancies.

Evaluating applicants based on their social aptitudes and specialized skills:

Our recruiters are trained to evaluate candidates based on their social aptitudes and specialized skills. We use a range of assessment tools and techniques to ensure that we provide you with the most suitable candidates.

Dedicated recruiter for your organization:

We provide you with a dedicated recruiter who works exclusively for your organization. This ensures that the recruiter understands your organization's culture and values and is better equipped to find the right candidates. Recruiting consultation and advice: We provide recruiting consultation and advice to help you optimize your recruiting process. Our team of experts can provide you with insights and guidance on best practices, industry trends, and more.
